+\$77 995

Total base wages earned during an average three year apprenticeship
(not including overtime, travel, tool and other allowances)

Source: Wagenet

When you're in a building and construction apprenticeship, you're earning wages whilst you learn skills and build real-world experience on the job.

Compare this with the HECS fees for a typical three-year university degree course, and a typical three-year apprenticeship puts you way in front.

And, there are no limits to how you can develop your career pathway in the building and construction industry.

Visit www.nolimits.com.au for more information on careers in WA's biggest industry.
